

Submission

Revised Future Water Project 2060 - Integrated Water Cycle Management Strategy (IWCM)

To: General Manager, Rous County Council, PO Box 230, Lismore NSW 2480

Name:

Adrian Scully ✓

Address:

I support these aspects of the IWCM for the reasons given in the IWCM:

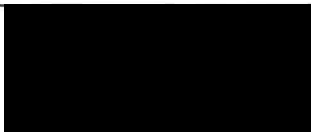

- Water loss management focused on Rous assets
- Section 15.4.2, development and implementation of a direct potable reuse scheme
- Sustainable groundwater usage **not** sourced from the existing upper level Alstonville aquifer
- Drought management planning
- Section 15.4.3, indirect potable water reuse in general and used to recharge harvested aquifers
- Sustainably powered temporary desalination plants on the coast
- Table 41, the disposal of land zoned for the Dunoon Dam

I oppose the Dunoon Dam that has been rejected by the Rous Board and the community several times.

I want Rous Councillors to know:

Ergonom seek better sources of water; collection at residential houses/
properties

Signed

Date: 28/5/21

- I'd like to keep in touch with the campaign with updates from Water Northern Rivers
- I want to be more actively involved

Submission

Revised Future Water Project 2060 – Integrated Water Cycle Management Strategy (IWCM)

To: General Manager, Rous County Council, PO Box 230, Lismore NSW 2480

Name: Lisa Miller

Address:

I support these aspects of the IWCM for the reasons given in the IWCM:

Water loss management focused on Rous assets

Section 15.4.2, development and implementation of a direct potable reuse scheme

Sustainable groundwater usage **not** sourced from the existing upper level Alstonville aquifer

Drought management planning

Section 15.4.3, indirect potable water reuse in general and used to recharge harvested aquifers

Sustainably powered temporary desalination plants on the coast

Table 41, the disposal of land zoned for the Dunoon Dam

I oppose the Dunoon Dam that has been rejected by the Rous Board and the community several times.

I want Rous Councillors to know:

that I am deeply concerned about the destruction of land which has cultural value for our Indigenous community, and about the impact on the environment & ecology.

I do not support the building of a dam.

Please find an environmentally & culturally considerate option.

Signed

Date: 25/5 / 21

Phone :

I'm surprised to see the Dunoon Dam appear so prominently in the IWCM as it has been rejected by the Rous Board and community multiple times.

I want Rous Councillors to know.....

I definitely do not want the Dunoon Dam
- Dams add to greenhouse effects.

- Traditional Owners have burial sites in the location.
They are opposed to the dam.

- We need water supply to be secure without relying on rain, especially now Climate Change is here.

- Re-use water, tighten water efficiencies

- 30% of Perth's water comes from waste water

- We have lost too much of the big scrub.

I SUPPORT these aspects of the IWCM, for the reasons given in the IWCM

Water loss management focused on Rous assets

Section 15.4.2, development and implementation of direct potable reuse scheme

Sustainable groundwater usage NOT from the existing upper level Alstonville aquifer

Drought management planning

Section 15:4:3 Indirect potable water reuse, & its potential to recharge harvested aquifers

Sustainably powered temporary desalination plants on the coast

Revised Future Water Project 2060 - Integrated Water Cycle Management Strategy (IWCM)

To: General Manager, Rous County Council, PO Box 230, Lismore NSW 2480

Name: Peter Stephens.

I support these aspects of the IWCM for the reasons given in the IWCM:

Water loss management focused on Rous assets

Section 15.4.2, development and implementation of a direct potable reuse scheme

Sustainable groundwater usage **not** sourced from the existing upper level Alstonville aquifer

Drought management planning

Section 15.4.3, indirect potable water reuse in general and used to recharge harvested aquifers

Sustainably powered temporary desalination plants on the coast

Table 41, the disposal of land zoned for the Dunoon Dam

I oppose the Dunoon Dam that has been rejected by the Rous Board and the community several times.

I want Rous Councillors to know:

Not enough attention has been given to "demand management" & "stormwater harvesting" before giving in to putting in new dams. USE LESS WATER.

Feedback Submission
Revised Future Water Project 2060 - Integrated Water Cycle Management strategy

To: General Manager, Rous County Council
PO Box 230, Lismore NSW 2480

Name: MARGARET SCRINI

I'm surprised to see the Dunoon Dam appear so prominently in the IWCM as it has been rejected by the Rous Board and community multiple times.

I want Rous Councillors to know.....

- * It is disrespectful to local indigenous culture
- * We need to protect the small remaining remnant (1%) of the Big Scrub
- * The community needs to know we are already drinking recycled water.
- * How realistic is it to rely on the overflow of Rocky Creek Dam to fill Dunoon Dam

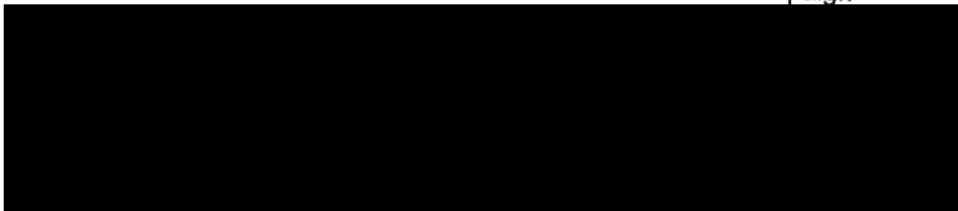

I SUPPORT these aspects of the IWCM, for the reasons given in the IWCM

- Water loss management focused on Rous assets
- Section 15.4.2, development and implementation of direct potable reuse scheme
- Sustainable groundwater usage NOT from the existing upper level Alstonville aquifer
- Drought management planning
- Section 15:4:3 Indirect potable water reuse, & its potential to recharge harvested aquifers
- Sustainably powered temporary desalination plants on the coast

Table 41, the disposal of land zoned for the Dunoon Dam

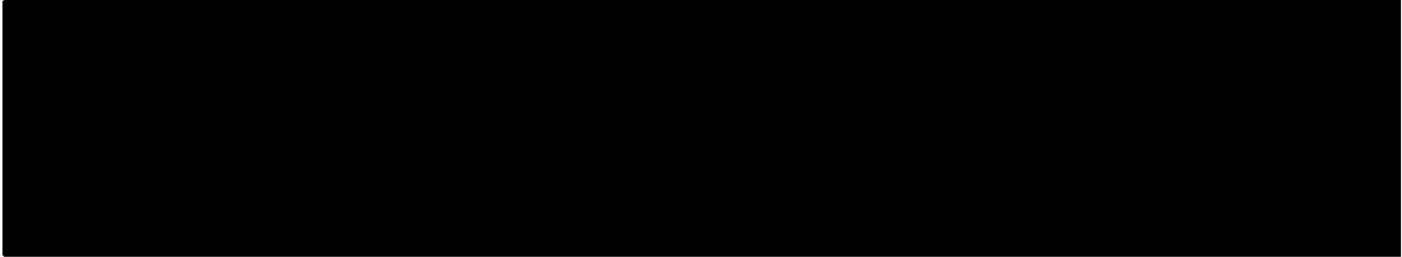

I'd like to receive updates of the Water Northern Rivers campaign

Feedback Submission
Revised Future Water Project 2060 - Integrated Water Cycle Management strategy

To: General Manager, Rous County Council
PO Box 230, Lismore NSW 2480

Name: SANBRA BURTON

I'm surprised to see the Dunoon Dam appear so prominently in the IWCM as it has been rejected by the Rous Board and community multiple times.

I want Rous Councillors to know.....

This scheme is disrespectful to
the indigenous culture the Widyabool
Wia Bal.

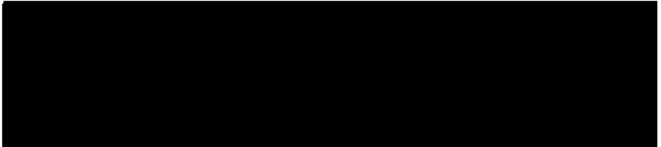

I SUPPORT these aspects of the IWCM, for the reasons given in the IWCM

- Water loss management focused on Rous assets
- Section 15.4.2, development and implementation of direct potable reuse scheme
- Sustainable groundwater usage NOT from the existing upper level Alstonville aquifer
- Drought management planning
- Section 15:4:3 Indirect potable water reuse, & its potential to recharge harvested aquifers
- Sustainably powered temporary desalination plants on the coast

I want Rous Councillors to know:

I believe that the dam is ~~not~~
a risky ~~oversive~~ strategy and
support the diversification of
the water supply. I am keen for
recycling water, and support the
current water plan. I fear the destruction
the dam will cause.

Date: 18/4/2021

I'd like to keep involved

I want to be more actively involved

Submission

Revised Future Water Project 2060 – Integrated Water Cycle Management Strategy

To: General Manager, Rous County Council, PO Box 230, Lismore NSW 2480

Name: Philippa Murphy-Haste

I support these aspects of the IWCM for the reasons given in the IWCM:

- Water loss management focused on Rous assets
- Section 15.4.2, development and implementation of a direct potable reuse scheme
- Sustainable groundwater usage **not** sourced from the existing upper level Alstonville aquifer
- Drought management planning
- Section 15.4.3, indirect potable water reuse in general and used to recharge harvested aquifers
- Sustainably powered temporary desalination plants on the coast
- Table 41, the disposal of land zoned for the Dunoon Dam

I'm surprised to see the Dunoon Dam appear so prominently in the IWCM as it has been rejected by the Rous Board and the community several times.

I want Rous Councillors to know:

I support sustainable environmental planning that protects ~~and~~ the natural beauty of the area.

- I'd like to keep in touch with the campaign with updates from Water Northern Rivers
- I want to be more actively involved

Submission

Revised Future Water Project 2060 – Integrated Water Cycle Management Strategy

To: General Manager, Rous County Council, PO Box 230, Lismore NSW 2480

Name: *Indira Corant*

I support these aspects of the IWCM for the reasons given in the IWCM:

- Water loss management focused on Rous assets
- Section 15.4.2, development and implementation of a direct potable reuse scheme
- Sustainable groundwater usage **not** sourced from the existing upper level Alstonville aquifer
- Drought management planning
- Section 15.4.3, indirect potable water reuse in general and used to recharge harvested aquifers
- Sustainably powered temporary desalination plants on the coast
- Table 41, the disposal of land zoned for the Dunoon Dam

I'm surprised to see the Dunoon Dam appear so prominently in the IWCM as it has been rejected by the Rous Board and the community several times.

I want Rous Councillors to know:

I want to be more actively involved

Submission

Revised Future Water Project 2060 - Integrated Water Cycle Management Strategy

To: General Manager, Rous County Council, PO Box 230, Lismore NSW 2480

Name: Alexia Keskerides

I support these aspects of the IWCM for the reasons given in the IWCM:

Water loss management focused on Rous assets

Section 15.4.2, development and implementation of a direct potable reuse scheme

Sustainable groundwater usage **not** sourced from the existing upper level Alstonville aquifer

Drought management planning

Section 15.4.3, indirect potable water reuse in general and used to recharge harvested aquifers

Sustainably powered temporary desalination plants on the coast

Table 41, the disposal of land zoned for the Dunoon Dam

I'm surprised to see the Dunoon Dam appear so prominently in the IWCM as it has been rejected by the Rous Board and the community several times.

I want Rous Councillors to know:

that ~~and~~ this (or any) threat
to the ~~existing~~ 1% remnant
vegetation is no good.

The community says no!

n Rivers

I want to be more actively involved

Submission

Revised Future Water Project 2060 – Integrated Water Cycle Management Strategy

To: General Manager, Rous County Council, PO Box 230, Lismore NSW 2480

Name: Anna Snowsill

I support these aspects of the IWCM for the reasons given in the IWCM:

Water loss management focused on Rous assets

Section 15.4.2, development and implementation of a direct potable reuse scheme

Sustainable groundwater usage **not** sourced from the existing upper level Alstonville aquifer

Drought management planning

Section 15.4.3, indirect potable water reuse in general and used to recharge harvested aquifers

Sustainably powered temporary desalination plants on the coast

Table 41, the disposal of land zoned for the Dunoon Dam

I'm surprised to see the Dunoon Dam appear so prominently in the IWCM as it has been rejected by the Rous Board and the community several times.

I want Rous Councillors to know:

Sbtrop. Any threat to the 1% of remnant vegetation remaining in this ~~year~~ area is totally unacceptable. We need these areas for seed & regen which will be vital for reforesting degraded landscapes

I'd like to keep in touch with the campaign with updates from Water Northern Rivers

I want to be more actively involved

Submission

Revised Future Water Project 2060 - Integrated Water Cycle Management Strategy

To: General Manager, Rous County Council, PO Box 230, Lismore NSW 2480

Name: Matthew Meanwell

I support these aspects of the IWCM for the reasons given in the IWCM:

- Water loss management focused on Rous assets
- Section 15.4.2, development and implementation of a direct potable reuse scheme
- Sustainable groundwater usage **not** sourced from the existing upper level Alstonville aquifer
- Drought management planning
- Section 15.4.3, indirect potable water reuse in general and used to recharge harvested aquifers
- Sustainably powered temporary desalination plants on the coast
- Table 41, the disposal of land zoned for the Dunoon Dam

I'm surprised to see the Dunoon Dam appear so prominently in the IWCM as it has been rejected by the Rous Board and the community several times.

I want Rous Councillors to know:

Any threat to the 1% of remaining
remnant is unacceptable

I'd like to keep in touch with the campaign with updates

I want to be more actively involved

Submission

Revised Future Water Project 2060 - Integrated Water Cycle Management Strategy

To: General Manager, Rous County Council, PO Box 230, Lismore NSW 2480

Name: *Dylan James*

I support these aspects of the IWCM for the reasons given in the IWCM:

Water loss management focused on Rous assets

Section 15.4.2, development and implementation of a direct potable reuse scheme

Sustainable groundwater usage **not** sourced from the existing upper level Alstonville aquifer

Drought management planning

Section 15.4.3, indirect potable water reuse in general and used to recharge harvested aquifers

Sustainably powered temporary desalination plants on the coast

Table 41, the disposal of land zoned for the Dunoon Dam

I'm surprised to see the Dunoon Dam appear so prominently in the IWCM as it has been rejected by the Rous Board and the community several times.

I want Rous Councillors to know:

I do not support this dam project.

Find more sustainable solutions to future water demands.

I'd like to keep in touch with the campaign with updates from Water Northern Rivers

I want to be more actively involved

Submission

Revised Future Water Project 2060 – Integrated Water Cycle Management Strategy

To: General Manager, Rous County Council, PO Box 230, Lismore NSW 2480

Name: *Holly Rong*

I support these aspects of the IWCM for the reasons given in the IWCM:

Water loss management focused on Rous assets

Section 15.4.2, development and implementation of a direct potable reuse scheme

Sustainable groundwater usage **not** sourced from the existing upper level Alstonville aquifer

Drought management planning

Section 15.4.3, indirect potable water reuse in general and used to recharge harvested aquifers

Sustainably powered temporary desalination plants on the coast

Table 41, the disposal of land zoned for the Dunoon Dam

I'm surprised to see the Dunoon Dam appear so prominently in the IWCM as it has been rejected by the Rous Board and the community several times.

I want Rous Councillors to know:

That I do not support the Dunoon Dam & they do not represent my voice.

I'd like to keep in touch with the campaign with updates from Water Northern Rivers

I want to be more actively involved

Feedback Submission
Revised Future Water Project 2060 - Integrated Water Cycle Management strategy

To: General Manager, Rous County Council
PO Box 230, Lismore NSW 2480

Name: *SERGIO SCUDERY*

I'm surprised to see the Dunoon Dam appear so prominently in the IWCM as it has been rejected by the Rous Board and community multiple times.

I want Rous Councillors to know.....

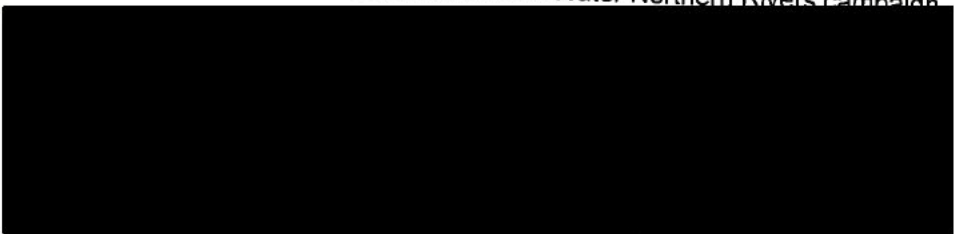

that there are less destructive alternatives to meet future water needs of this region

I SUPPORT these aspects of the IWCM, for the reasons given in the IWCM

- Water loss management focused on Rous assets
- Section 15.4.2, development and implementation of direct potable reuse scheme
- Sustainable groundwater usage NOT from the existing upper level Alstonville aquifer
- Drought management planning
- Section 15:4:3 Indirect potable water reuse, & its potential to recharge harvested aquifers
- Sustainably powered temporary desalination plants on the coast

Table 41, the disposal of land zoned for the Dunoon Dam

I'd like to receive updates of the Water Northern Rivers campaign

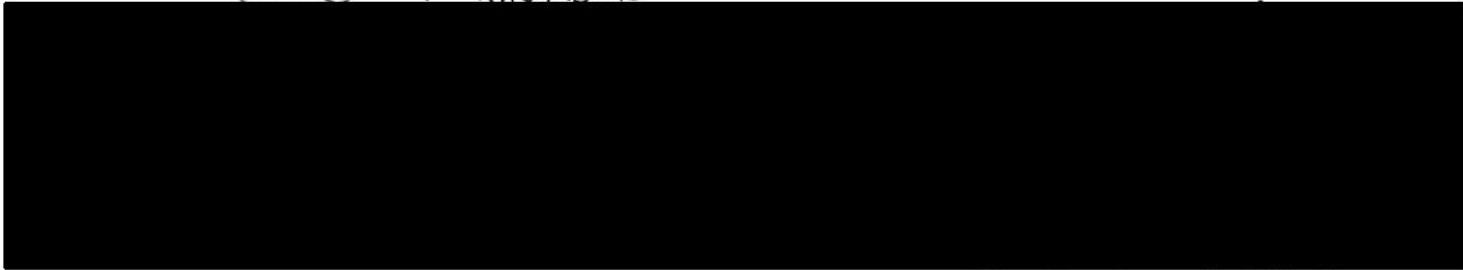

Feedback Submission

Revised Future Water Project 2060 - Integrated Water Cycle Management strategy

To: General Manager, Rous County Council
PO Box 230, Lismore NSW 2480

Name: Ross Honniball

I'm surprised to see the Dunoon Dam appear so prominently in the IWCM as it has been rejected by the Rous Board and community multiple times.

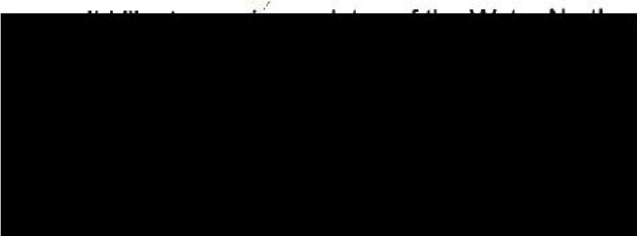

I want Rous Councillors to know.....

I support all diverse water management strategies
and would like you to also consider
limiting population growth in this region.

I SUPPORT these aspects of the IWCM, for the reasons given in the IWCM

- ✓ Water loss management focused on Rous assets
- ✓ Section 15.4.2, development and implementation of direct potable reuse scheme
- ✓ Sustainable groundwater usage NOT from the existing upper level Alstonville aquifer
- ✓ Drought management planning
- ✓ Section 15:4:3 Indirect potable water reuse, & its potential to recharge harvested aquifers
- ✓ Sustainably powered temporary desalination plants on the coast
